

Reality Twist wins the Level-Up program

This September, the organizers for the game business matchmaking event “Game Connection” in Lyon announced the five Level-up program winners, and Reality Twist is one of them.

“Evil Island is the first kite boarding game ever standing out due to innovative gameplay dynamics through highly-realistic kite-control, physics and AI driven environment”, explains the official statement the decision of the jury. Reality Twist feels honored and will attend and exhibit its portfolio at this year’s expo in November.

The program aims to help developers to present their games buyers and publishers at the Game Connection Europe. Winning companies can exhibit for free at the event and get a free closed meeting room as well, similar to the other exhibitors.
